## FEBRUARY 2007

---

### President's Report

The Committee of AANSW, as Co-Conveners of the **17<sup>th</sup> FAA International Astrology Conference 2008**, along with the FAA are proud to announce the exciting Astrological news that we have confirmed Rob Hand for the **Pre-Conference Workshop** to be held on Thursday the 24<sup>th</sup> of January 2008. We are also happy to announce Post Conference Workshops on Monday the 28<sup>th</sup> of January 2008 with Erin Sullivan, Richard Tarnas and Lynn Bell. If you wish to take advantage of this unique opportunity I suggest you book early as we are already receiving a flood of enquiries. The Conference matters are proceeding well and we have already received many bookings as delegates take advantage of the early bird rates. All Conference information is available on the FAA website. AANSW website is undergoing reconstruction, but we will be back online very soon.

On Saturday February 3rd we held our first meeting for 2007 at the new venue in Gladesville, just a short distance from our previous venue. I'm happy to say everything went well with one of the largest member attendance for some time. Dr Neil Hair explored themes of Pluto and Neptune, relating them to prominent patterns affecting the world in 2007, and in particular Australia and the USA.

AANSW has good variety of speakers lined up for 2007 and we look forward to some great astrology culminating with the conference in January 2008. All visitors are welcome at our meetings.

Finally, on behalf of the AANSW committee and Members I would like to take this opportunity to thank Gillian Ayers for her years of hard work and dedication whilst fulfilling her role as President of AANSW from 2004 until 2007. We wish you all the best Gillian.

**Gregory Clare,**  
**AANSW President**

### **AANSW SYDNEY Meetings**

#### **Where:**

Gladesville RSL Club  
Auditorium  
4-6 Linsley Street  
Gladesville

#### **When:**

1<sup>st</sup> Saturday of the  
month  
(except January) at  
1pm.

### **Correspondence PO Box 253 Guildford 2161**

*AANSW is a non-profit organization whose aim is to promote and further interest in Astrology in NSW.*

*The views and opinions expressed in this Newsletter are not necessarily those of the editor or the general membership.*

*The editor reserves the right to edit article submissions before publication.*

*This Newsletter is published 11 times a year February – December.*

## **Calendar of Events 2007**

**Saturday 3 March 2007.  
Lynda Hill  
Presents  
The Chart as Hologram**

Lynda will take us on a fascinating journey discovering the stories that charts tell. The circle of the zodiac works like an aura around the earth and the degrees of the zodiac are tick points around that circle. Each degree is related to every other degree and we all have every degree in our chart. The aspects also tell the story of the chart and through the use of the Sabian Symbols we can discover much more about what's going on and why. Come along and discover how to look at charts in a very different way, even if you don't use the Sabian Symbols, you'll learn a new way of looking at the interplay of the entire chart.

**April Speaker: Ed Tamplin  
May Speaker: Kelly Surtees  
June Speaker: Gary Goldschneider  
July Speaker: Ann Robertson**

### **THE SOUTHERN ASTROLOGER'S GROUP**

**Venue: Flame Tree Cafe  
Address: 89 Crown Street,  
Wollongong  
Time: 1.00pm – 4.00pm  
When: The 3<sup>rd</sup> Saturday of the  
month**

#### **Meeting dates for 2007**

**February 17, March 17, April 21,  
May 19, June 16, July 21, August  
18, September 15, October 20,  
November 17, December 15**

**Cost: Free**

**Food & Beverages Available**

**Any questions – contact Chris on  
0410 565 954**

**Email: [crstina1@bigpond.net.au](mailto:crstina1@bigpond.net.au)**

**This Group enjoys the full  
support of AANSW Committee**

**ALL WELCOME**

**\*\*\*\*FOR SALE\*\*\*\*\***

**“Astronomy for Astrologers” (Astrolab) CD Several Copies  
created by Australian Astrologer/Astronomer Martin Lewicki.**

**Gain an understanding of the Astronomical principles behind  
Astrology (house systems, eclipses, etc).**

**An essential resource in preparing for the FAA Calculation Exam.

## Secretary's Bulletin Board

### *Hire of CD's and Tapes*

CD's from the 2006 Melbourne Conference are available for hire at monthly meetings and from the Mail Order Library.

The cost to hire all CD's/tapes is \$3 each or 4 for \$10.

**F.Y.I**

**CHECK OUT  
OUR  
WEBSITE  
AT**

[www.astrologynsw.com.au](http://www.astrologynsw.com.au)

### Moving House??

Please let us know your **new address** so we can keep our membership records up to date. If you have updated your **email address** recently we'd like to know the new address, as it's important that we do have correct member records in our database.

### **YAA Meetings in 2007**

Tuesdays

March 6, April 3, May 1, June 5 July 3, August 7, September 4  
October 2, Nov 6, Dec 4

New Venue

The Earth Institute  
Suite 1/20 Clarke Street  
Crows Nest

**Any questions – contact Kelly on  
0414 414 564**

**Email: [info@kellysurtees.com](mailto:info@kellysurtees.com)**

Join the FAA through the AANSW (<http://www.astrologynsw.com.au/index.htm>) today and get two meetings a month (AANSW and YAA) at membership rates

Looking forward to seeing you all there!

### *AA NSW Mail Order Book and CD Library*

**A service we offer to local members unable to attend our monthly meetings and for our country members.**

Why not make use of our Mail Order CD and Book Library.

If you are interested in hiring CD's, Tapes or Books please contact Cecily Bazak at [cecilyb@tpg.com.au](mailto:cecilyb@tpg.com.au) who will send you a list of the books and CD's available for hire.

The cost for Mail Order hire is \$3/item or 4 items for \$10 plus \$5 postage

### Attention!!!

### F.A.A Exam Candidates and Practitioners

Would you like to apply to become a member of The Association for Professional Astrologers (A.P.A) Information about the Association, our aims and Application for Membership forms are available from the APA Website:

Go To [www.faainc.org.au](http://www.faainc.org.au) and click on the link to the APA or contact the Secretary Sylvia Wilson by email at: [sylviawilson@optusnet.com.au](mailto:sylviawilson@optusnet.com.au)

## *AstraView*

### *With Clementine of Aqua Moon*

For those of you who are by now feeling like "here we go again, another year ahead of me" a little light relief is presented to you in the form of St Valentine's Day. We can get upset by the commercialism of the day or we can jump on the bandwagon (or even just stand in the street and watch the wagon go by) and inject a bit of fun and romance into our lives. Whichever, the opportunity is there to divert our attention from the possible despondency that accompanies this time of the year.

Valentine's Day this year sees Venus exalted in Pisces (20° 22') in a sextile aspect to Mars, also in its exaltation, in Capricorn (20° 33'). Venus sits in the sign of true romanticism whilst its counterpart holds court in the sign, which displays a cautious but strong physical (and sexual) energy. Mars in Capricorn knows what it wants and knows how to go about getting it and pretty little Venus may just be the object of its desire. But as in all fairy tales we usually come across the big bad wolf, which in this case comes in the form of Yod aspect to Saturn in Leo (20° 33'). Yods are about amendments, modifications, or even regeneration either physically, mentally or spiritually, so that while Mars is busily displaying its showcase colourful plumage to the easily susceptible Venus there may be serious adjustments required if this little affair is ever to get off the ground. Further to a possibility moved into Pisces on 2 February, goes into retrogradation on this day (10° Pisces 14' at 3:38pm) – so the words of love and endearment may all prove nothing more than an illusion when mercury heads back in a direct movement on 8 March.

Whilst on the subject of Yods, this month's Leo Full Moon (2 February - 12° 59') also forms a tight Yod formation to Uranus (12° Pisces 56') and Mars (12° Capricorn 06') with the sun at the midpoint. Again the spiritual, ethereal flavour of Pisces strengthened by the sextile to the strong, earthy energy of Capricorn will need to adjust to a moon which finds it's nurturing through a pride and confidence in self. Herein also lies, the opposition challenge for the sun in Aquarius calls for objectivity in relation to the masses rather than the more self-focus of Leo. Together though they have the best interests of all at heart.

The new moon this month falls in Aquarius (18 February - 28° 37'). No Yods here only a sextile to Pluto (28° Sagittarius 29') so we can be sure the Aquarian values of equal rights, freedom of expression and worldwide community focus will be intensified and given a positive explosion of power. It's always fun to check out where new and full moons fall in your own chart and watch for possible personal manifestations around those dates.

Besides Mercury's change of sign on 2 February from Aquarius to Pisces Venus moves on into Aries on 21 February (a possible indicator that any fickle Valentine romances will come to a screaming halt as Venus comes out from under Neptune's spell and puts her ram's head into a self focussed full steam ahead mode). Plus, Mars leaves Capricorn on 26 February and takes his energy into Aquarius where it will assert itself independently, eccentrically but with intelligence.

And finally just in case you thought you had escaped Saturn's ever-watchful eye, on the last day of the month retrograde Saturn (20° Leo 19') sits in exact opposition to Neptune (20° 12') just to ensure there will be no daydreaming in the corner.

*Clementine*

## *Maureen's Musings*

### **Creating a Future With Astrology**

From a lecture by Jeff Jawer,  
Sydney Conference 2002.

In this lecture, Jeff, who will be presenting lectures at the upcoming Sydney Conference, discusses the role of the astrologer as a counsellor to the client, and states that we can really positively affect the direction of things in the clients life simply by overcoming the need to be right. Too often, he says, the consultation time is wasted in the astrologer proving accuracy to the client by informing them of things they already know. This time could be better spent pushing the barriers, moving the energy of the chart past this superficiality and taking up the role of change-agent or healer with the client.

He further discusses how too often we rely on transits and progressions to predict for our clients when nothing can really happen unless the natal chart has the potential of it occurring. He likens a transit's effect on an individual to a week's rain in the Australian desert – does the desert become something else because of a week's rain? No. So he argues that transits cannot alter what the natal potential indicates in any long-standing way. He talks about the progressed Moon, retrograde planets and the transpersonals. The main thrust of his lecture is that "astrology is not to report the scorecard of the finished game before it's ended, but to contribute to the quality of the experience that we all have."

Jeff is a very experienced astrologer and an accomplished speaker, and one who will be very popular at next year's conference.

*Maureen*

## Editors Report

I hope you all had a great Christmas and New Year. Anita, Gillian and myself have recently returned from the F.A.A AGM in Western Australia. F.A.A W.A treated the National Councillors and National Executive like royalty and to top it off we were all fortunate enough to get a birds eye view on 3 successive nights of the McNaught Comet. Greg tells you about this comet in his February Planet Watch. Anita, myself and our host, Robyn Binks, were able to watch a most beautiful sunset over the ocean at Scarborough Beach, see Venus setting and also the comet – what a smorgasbord of astronomical phenomena.

This is our first report for 2007 and one where I am sad to report that the AANSW President, Gillian Ayers has resigned as AA NSW President as well as the Conference Convener. After our February meeting the committee met and elected Greg Clare as our Interim President until September AGM. The rest of Conference Committee remains intact with Anita, Greg, Maureen and myself being joint Conference Conveners with Brian Clark as Conference Coordinator. The Conference Committee met again on Saturday 10<sup>th</sup> February to finalise the speakers and topics for the 2008 Sydney Conference. The plans are going well and there will be an information update in the March F.A.A Journal.

Those who attended the first meeting at Gladesville RSL Club were delighted that even though we had a capacity crowd they all had a seat. It's a great venue and I hope we will be there for a while. Neil Hair was our speaker in February and he captivated the members with his Forecasts for 2007. Lynda Hill, the talented speaker and writer of the Sabian Symbols series of books will be our guest speaker at the March meeting so come along and enjoy Lynda's talk as she certainly knows her astrology and is a great speaker. I have been busy organising the speaker program for 2007 and have just about filled each month now. We have a terrific line-up for you this year with an added bonus of having Gary Goldschneider, author of "The Birthday Book" and "The Book of Relationships" speaking at our June meeting. Gary is visiting Australia from the U.S between May and July and contacted me late last year to see if we would be interested in having him along at a meeting, needless to say I said yes.

Our April speaker is Ed Tamplin who will be looking at important World Events for 2007.

*Cheers  
Cecily*

earth institute  
TRANSFORMATION · EDUCATION · CONSCIOUSNESS

Earth Institute offers Contemporary Astrology courses for:

- GENERAL INTEREST
- CERTIFICATE LEVEL
- DIPLOMA LEVEL
- MASTERY IN ADVANCED CONTEMPORARY ASTROLOGY

“A soul focused centre for personal and planetary transformation, education and consciousness.”

KELLY SURTEES astrologer

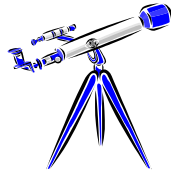

While honoring and integrating the essence of Astrology, Earth Institute's Astrology program sits in a philosophical framework that connects individual change to planetary growth. Through our course, you, the individual, experience your own growth as reflected in the stars and connect with how your evolution supports the consciousness shift happening here on Earth.

Earth Institute's Astrology courses equip you with the knowledge to both change yourself and facilitate soul growth within those around you. Earth Institute offers Astrology courses for both the beginner and advanced student. All our programs are in line with the nationally recognised FAA syllabus.

## *Planet Watch*

Written & Researched by Gregory Clare ©

Welcome all to the February edition of Planet Watch, the first for 2007. Many of you may be aware, but for those who are not let me first say that January 2007 has been a great start to the observation of our local sky.

All the talk at present is about how good Comet McNaught was. Ok a little on Comet McNaught. It was discovered last August by astronomer Robert McNaught at Australia's Siding Spring Observatory and was one of the greatest comets in recent times. It evolved into a brilliant object as it swept past the Sun on Jan. 12, at a distance of just 15.9 million miles. During January, observers found the comet so brilliant that it could be seen with the naked eye in broad daylight, if the Sun was hidden behind the side of a house or even an outstretched hand.

### ***"Brighter than Venus***

According to reports received from a worldwide audience at the International Comet Quarterly (ICQ) it appears that the comet reached peak brightness on Sunday, Jan. 14 at around 12 hours UT (7:00 a.m. EST). At that time, the comet was shining at magnitude -5.1. On this scale, larger numbers represent dimmer objects; the brightest stars are generally zero to first magnitude, while superb right objects such as Venus and Comet McNaught achieve negative magnitudes.

I determined the comet's peak magnitude by averaging out more than a dozen observations that were reported to the ICQ on Jan. 14. Some observers, such as Steve O'Meara, located at Volcano, Hawaii, observed McNaught in daylight and estimated a magnitude as high as -6, noting. "The comet appeared much brighter than Venus!" From Jan. 12-16, Comet McNaught ranked as the third brightest object in the sky behind only the Sun and the Moon!

Was Comet McNaught the best or brightest comet ever seen? While it's true that comets that are visible with the naked eye during the daytime are rare, the case of McNaught is not unique. In the last 263 years, it has happened seven other times:" (Space .com)

### ***What's next for Comet McNaught?***

Viewers in the Southern Hemisphere will have had Comet McNaught pretty much to themselves in January, continuing to be a striking object in the west-southwest sky as darkness fell.

If a parallel can be drawn between Comet McNaught and any of the below-mentioned comets, it's that it should gradually fade as it moves away from both the Earth and Sun. As we have previously noted, new comets can be notoriously unpredictable to forecast, but it appears now that McNaught should be shining

somewhere between magnitude 0 and 2 on Jan. 21, then fade to perhaps magnitude 5 by the end of January or early February. Although the comet is fading as it moves higher into the sky and sets progressively later, its tail should appear to impressively lengthen.

It should have appeared at its longest 15<sup>th</sup> 17th January before the increasing brightness of the waxing Moon begins to compromise the view. Without doubt, Comet McNaught's performance will stand as one of the most spectacular in recent years. For those fortunate enough to have seen it, it will always be a comet to remember

***So readers as a feature this month lets take a look at some of the great lights of the past...The info is courtesy of Space.com which is sent to daily.***

GREAT COMET OF 1744: First sighted on Nov. 29, 1743 as a dim fourth magnitude object, this comet brightened rapidly as it approached the Sun. Many textbooks often cite Philippe Loys de Cheseaux, of Lausanne, Switzerland as the discoverer, although his first sighting did not come until two weeks later. By mid-January 1744, the comet was described as 1st-magnitude with a 7-degree tail. By Feb. 1 it rivalled Sirius and displayed a curved tail, 15-degrees in length. By Feb. 18 the comet was equal to Venus and now displayed two tails. On Feb. 27, it peaked at magnitude -7 and was reported visible in the daytime, 12-degrees from the Sun. Perihelion came on March 1st, at a distance of 20.5 million miles from the Sun. On March 6, the comet appeared in the morning sky, accompanied by six brilliant tails which resembled a Japanese hand fan.

GREAT COMET OF 1843: This comet was a member of the Kruetz Sun grazing Comet Group, which has produced some of the most brilliant comets in recorded history. It passed only 126,000 miles from the Sun's photosphere on Feb. 27, 1843. Although a few observations suggest that it was seen for a few weeks prior to this date, on the day when it made it closest approach to the Sun it was widely observed in full daylight. Positioned only 1-degree from the Sun, this comet appeared as "an elongated white cloud" possessing a brilliant nucleus and a tail about 1-degree in length. Passengers on board the ship Owen Glendower, off the Cape of Good Hope described it as a "short, dagger-like object" that closely followed the Sun toward the western horizon. In the days that followed, as the comet moved away from the Sun, it diminished in brightness but the tail grew enormously, eventually attaining a length of 200 million miles. If you were able to place the head of this comet at the Sun's position, the tail would have extended beyond the orbit of the planet Mars!

GREAT SEPTEMBER COMET OF 1882: This comet is perhaps the brightest comet that has ever been seen; a gigantic member of the Kruetz Sun grazing Group. First spotted as a bright zero-magnitude object by a group of Italian sailors in the Southern Hemisphere on Sept. 1, this comet brightened dramatically as it approached its rendezvous with the Sun.

By the 14th, it became visible in broad daylight and when it arrived at perihelion on the 17th it passed at a distance of only 264,000-miles from the Sun's surface.

On that day, some observers described the comet's silvery radiance as scarcely fainter than the limb of the Sun, suggesting a magnitude somewhere between -15 and -20! The following day, observers in Cordoba described the comet as a "blazing star" near the Sun. The nucleus also broke into at least four separate parts. In the days and weeks that followed, the comet became visible in the morning sky as an immense object sporting a brilliant tail. Today, some comet historians consider it as a "Super Comet," far above the run of even Great Comets.

**GREAT JANUARY COMET OF 1910:** The first people to see this comet then already of first magnitude were workmen at the Transvaal Premier Diamond Mine in South Africa on Jan. 13. Two days later, three men at a railway station in nearby Kopjes casually watched the object for 20-minutes before sunrise, assuming that it was Halley's Comet. Later that morning, the editor of the local (Johannesburg) newspaper telephoned the Transvaal Observatory for a comment. The observatory's Director, Robert Innes, must have initially thought this sighting was a mistake, since Halley's Comet was not in that part of the sky and nowhere near as conspicuous. Innes looked for the comet the following morning, but clouds thwarted his view. But on the morning of the 17th, he and an assistant saw the comet, shining sedately on the horizon just above where the Sun was about to rise. Later, at midday, Innes viewed it as a snowy-white object, brighter than Venus, several degrees from the Sun. He sent out a telegram alerting the world to expect "Drake's Comet" or "Great Comet" as it sounded to the telegraph operator. It was visible during the daytime for a couple of more days, then moved northward and away from the Sun, becoming a stupendous object in the evening sky for the rest of January for the Northern Hemisphere. Ironically, many people in 1910 who thought they had seen Halley's Comet, instead likely saw the Great January Comet that appeared about three months before Halley.

**COMET SKJELLERUP-MARISTANY, 1927:** Another brilliant comet, first seen as a third magnitude object in early December, had the unfortunate distinction of being situated under the poorest observing circumstances possible. The orbital geometry was such, that the approaching comet could not be seen in a dark sky at any time from either the Northern or the Southern Hemisphere. But it reached tremendous magnitude at perihelion on Dec. 18. Located at a distance of 16.7 million miles from the Sun, it was visible in daylight about 5-degrees from the Sun at a magnitude of -6. As the comet moved out of the twilight and headed south into darker skies, it faded rapidly, but still threw off an impressively long tail that reached up to 40-degrees in length by the end of the month.

**COMET IKEYA-SEKI, 1965:** This was the brightest comet of the 20th century, and was found just over a month before perihelion passage in the morning sky moving rapidly toward the Sun. Like the Great Comets of 1843 and 1882, Ikeya-Seki was a Kreutz Sun grazer and on Oct. 21 swept to within 744,000 miles of the centre of the Sun.

The comet was then visible as a brilliant object within a degree or two of the Sun, and wherever the sky was clear, the comet could be seen by observers merely by blocking out the Sun with their hands. From Japan, the homeland of the observers who discovered it, Ikeya-Seki was described as appearing "ten times brighter than the Full Moon" corresponding to a magnitude of -15. Also at that time, the nucleus was observed to break into two or three pieces. Thereafter, the comet moved away in full retreat from the Sun, the head fading very rapidly but its slender, twisted tail, reaching out into space for up to 75 million miles, and dominating the eastern morning sky right on through the month of November.

COMET WEST, 1976: This comet developed into a beautiful object in the morning sky of early March 1976 for Northern Hemisphere observers. It was discovered in November 1975 by Danish astronomer, Richard West on photographs taken at the European Southern Observatory in Chile. Seventeen hours after passing within 18.3 million miles of the Sun on Feb. 25, it was glimpsed with the naked eye 10 minutes before sunset by John Bortle—the last daylight comet sighting until McNaught in 2007. In the days that followed, Comet West displayed a brilliant head and a long, strongly structured tail that resembled "a fantastic fountain of light."

Sadly, having been "burned" by the poor performance of Comet Kohoutek two years earlier, the mainstream media all but ignored Comet West, so most people unfortunately failed to see its dazzling performance! Well folks, that's all this month! I will endeavour in the coming months to fill you in on the up coming events in our local SKY, till then stay safe.

*Speaker's Report  
Pluto's Ascendancy  
The Invisible Mask comes off in 2007.*

**Dr Neil Hair**

Principal, Sydney School of Numerology

**Pluto's Ascendancy**

In August 2006, the International Astronomers Union demoted Pluto to "dwarf planet" status, coinciding with the God of the Underworld's penultimate year in Sagittarius. Perhaps, at some unconscious level, the Establishment felt this "slap on the wrist" would help it escape Pluto's gaze when 2008 arrives and Pluto begins its transformative excavation of Capricorn! 2007 is Pluto's last full year in the sign of the Centaur, and judging by the numerology for the year, Pluto's "helmet of invisibility" may be cast aside, in a powerful Sagittarian finale. 2007 itself indicates themes of emotional analysis, purification, transformation, rebirths, with the "double zeroes" cast in a supporting role as Pluto's home turf of Hades!

In summary, 2007 is shaping up like a "wall to wall" Pluto (Hades) experience, affecting the worlds of finance, money, economics, water, resources, spirituality, connection to the Divine, with some "under the table" assistance from sibling Neptune (Poseidon). In his talk, Neil will explore these themes, and relate them to prominent astrological patterns for 2007 affecting the world, and in particular USA and Australia.

*Universal Year 2007*

*Major Themes of 2007*

*Numerology -> Mythology and Astrology*

- *In Mythology, 27/9 patterns are embodied by the Greek God of the Underworld, Hades and Roman God, Pluto (and Moon / Scorpio)*
- *Feminine (2) separating from mind and spirituality (7), gulf to bridge in emotional analysis, opportunity to address need for transformation*
- *Due to double zeroes, old or hidden issues may arise relating to past, and 2007 is ideal time to examine old emotions and transform the past*

**Sectors for 2007 (27/9)**

- *Deeper spiritual awakening; Emotional catharsis; Evaluation, control, measurement and management of the flow of all resources on many levels - Aid, Compassion, Emotions, **Oil**, Water; Financial controls, Purification; Reform and rebirth; Spiritual growth; Transformation*
- *The influence of Neptune / Poseidon likely to "pop up" throughout 2007, supporting Pluto / Hades, showing shadow face of "Confuser" through unfounded fears, turbulence of feeling, "hurricanes", with perhaps a few financial "surprises" or more water-based events*

**The World in 2007**

- *Resurfacing of spirituality and religion, God making a second return in recent years, USA entering a period of transformation and rebirth*
- *Issues on financial and economic scene, tightening of money supply; valuation of scarce resources such as water and oil; management, supply, control and purification of water; dollars and dangers related to various sectors such as aid, drugs, water, chemicals, poisons*
- *Unresolved issues resurfacing from 2005 due neglect, lack of attention to sectors such as mental health, drugs, ocean borders, infiltration*

Neil spoke of the 'noughties' (00) and the need to transform and reform. He sees that 2007 on a personal level as a time to broach or bridge emotional gaps between ourselves and others over past issues so as to transform the relationship and move on. He spoke of hidden issues arising and the spirituality of the number '7' leading to the possibility of a deeper spiritual awakening. He also said that issues that arose in 2005 (a 7 year) that were not dealt with or resolved at that time will re-emerge and will need to be addressed. There could be uncertainty regarding finances and resources but I think Neil's notes speaker for volumes. Once again a thought provoking talk from Neil

*Anita*

*Neil very kindly provided the information he presented and I have copied some of it here for you this information is of course copy write to Neil.*
